Zinc is a very important mineral and is responsible for the maintenance of beautiful and healthy appearance of the hair and nails as well as the skin.

Flavonoids

Support and protect Collagen rich structures.

Enhance intracellular Vitamin C, which is vital for the formation of collagen

Collagen Pro-X

A valuable strategy used to keep the skin's youthful and smooth appearance is to replenish the collagen through the bioavailable form which is Hydrolysed collagen. The process in which it undergoes to achieve this is, is by enzymatic hydrolysis of collagenous tissue found in various sources such fish, chicken or beef. The collagen is broken down to small chains of amino acids making it easily absorbed into the blood stream and distributed to the skin and the other structures. These small chains of amino acids which are the building block go on to help the body to form new collagen structures by stimulating the production of new collagen, elastin and hyaluronic acid which in turn help to retain the moisture in the skin.

Increased skin firmness for younger and healthier glow

Introducing Collagen Pro - *X* the Pro-X factor for Beauty

A new and unique pharmaceutical grade formula to give glowing and radiating beauty with a combination of natural ingredients, which contribute synergistically to preserve the maintenance of normal Collagen formation for the normal function of skin, hair and nails.

The ever-increasing attention of the benefits of collagen, in combination with increasing consumer knowledge, has driven the consumer to reach out to find solutions to obtain 'beauty from within' and this is a global phenomenon.

By researching and refining ideas extensively, has led us to develop a unique approach to look at beauty as a whole.

We target the foundations of beauty and we aim to increase and strengthen it, with the ultimate goal of reaching 'beauty from within'.

**Glowing and radiating
beauty on the outside
reflects
healthy foundations on
the inside.**

Clinically effective formula that give glowing and radiating beauty, using natural ingredients that keep the skin, hair and nails looking their best.

Inspired by Elizabeth

Elizabeth a caring mother, a loving wife and a dedicated teacher lives a hectic life that is always on the go and never has time for herself. Always going over and beyond for her children, husband and students, neglecting her beauty her skin, hair and nails. Always putting everyone before herself and always drained but never complains. Elizabeth has started to age and the signs are becoming apparent.

She isn't sure which product is best for her so she decided to try various facial creams, lotions and products. She soon discovered that they had limited effect and targeted the superficial signs without **addressing the foundations of aging**. Elizabeth then decided to invest in trying to cover up her signs of aging and her wrinkled skin, because she felt the current anti-aging products available on the market weren't fulfilling her desires in achieving that youthful glow and healthy skin, hair and nails.

After months of constant make-up application to make her **feel more secure in her own skin**, Elizabeth started to notice an acceleration in her ageing, numerous break-outs and scarring of her skin.

Elizabeth wanted to go on her own personal journey, a journey whereby for once, she is doing something for her own self, and improving an aspect of herself that she feels will boost her confidence and remove her insecurities. She wanted once to go out and feel comfortable in her own skin, and obtain compliments on her skin and general wellbeing rather than questions about why her skin appeared so uneven and wrinkly. Elizabeth feels youthful at heart: she is active, busy and always on the go. She exercises regularly and has a well balanced diet. She has no medical problems. Elizabeth wants her outer health and skin to reflect her positive inner health.

For once in a very long time, Elizabeth wanted to take this first step towards improving the appearance of her skin, hair and nails in a way that not just improves the outer beauty and radiance in the short term, but also **focuses on improving the inner health as its foundation in the long term**. She wanted something to incorporate into her way of life as part of a healthy balanced lifestyle, and something that is natural and free from harsh chemicals. She always taught her students, that **a healthy body is a healthy mind**, and a healthy mind means that aging will never be a troublesome factor. Like many others out there, Elizabeth has many desires when it comes to achieving that healthy youthful glow and radiance, but doesn't have the time to invest in time-consuming expensive products or procedures with possible uncertain prognosis, numerous side-effects and that most importantly, don't end up working in the long term.

Elizabeth started to do her own research, does a natural based product exist, with minimal side effects, that focuses on improving one's inner health and as a result, targets the foundation of ageing to create healthy, radiant and youthful skin, hair and nails? This would be Elizabeth's ideal product.

Elizabeth is definitely not alone in her search. There are many others like Elizabeth who share the same story or can relate to her desires of improving her inner and outer beauty and wellbeing. This was our inspiration behind the development of our unique product Collagen Pro-X, a natural product that targets the foundations of aging from within and contributes to improving one's general wellbeing, to ensure a healthy body with radiance and glow for Elizabeth.

Zinc, is responsible to the maintenance of normal skin, hair and nails

The visible effects of dietary Collagen Pro-X supplements:

Skin

Increased skin firmness and suppleness and Decreased wrinkles and fine lines

Nails

Maintenance of healthy nails.

Hair

Maintenance of healthy, strong and shiny hair.

Who is Collagen Pro - X for?

As the human body reaches its 20's the inevitable process of aging begins, and so collagen starts to decline. Environmental factors such as smoking and stress further contribute to the increased signs of aging.

As a result the clear visible effects on the skin, hair and nails manifest.

Collagen Pro-X supplements can be safely consumed by male and female adults of all ages to get a head start on the decline of collagen and preserve their glowing and radiating beauty.

Collagen supplements can be taken daily to supplement but not replace a healthy balanced diet.

Younger
&
healthier glow

Collagen Pro X work synergistically for optimum anti-aging benefits. Collagen hydrolysate provides high levels of amino acids. Among these are glycine and proline, two amino acids essential for the stability and regeneration of cartilage. A single pictogram of type II collagen contains more than 1 billion glycine molecules and 620 million proline molecules. Collagen is the most abundant protein in our bodies. It's found in our muscles, bones (36%), skin (75%) and tendons (99%). It's the "glue" that helps hold the body together. It gives our skin strength and elasticity, and helps replace dead skin cells. As we age, collagen production declines, looser skin, more wrinkles and less elasticity. Increasing collagen levels can help your skin look firmer, increase smoothness, and help your skin cells keep renewing and repairing normally.

After age of 25-year-old collagen drop by about 1.5% each year. Meaning by the age of 45% of collagen is lost. This is a main cause of Aging and wrinkling. Collagen Pro X, as an internal collagen supplement might increase our body collagen production. This might help to reduce fine lines & wrinkles, thicken hair & nail.

Action: Collagen hydrolysate can stimulate collagen synthesis in the body. Two hypotheses have been developed to explain why collagen hydrolysate stimulates the body to synthesise collagen. Firstly, although the amino acids present in collagen are not „essential“, as they can be synthesised by the body, the regular intake of collagen hydrolysate could supply the required amounts of the amino acids glycine, proline and hydroxyproline. Secondly, the presence of collagen peptides could be recognised and understood by the body as a sign of degradation of the proper collagen. This could lead to the synthesise of collagen

Metabolism: Following oral administration, collagen hydrolysate is hydrolysed, absorbed in the gastrointestinal tract and transported in the bloodstream in the form of peptides and amino acids (proline, hydroxyproline, glycine) to the articular cartilage.

Dose: Evidence suggests that collagen hydrolysate in doses of up to 10 g daily for 6 months is safe

Pregnancy and breastfeeding: Safety in pregnancy and breastfeeding has not been established. However, collagen is a natural constituent of an omniverous diet.

Bioavailability: Studies have shown that a high percentage of an oral dose of collagen hydrolysate is absorbed. A Dutch trial using a simulated gastrointestinal tract model showed that 82% of an orally administered dose of collagen hydrolysate passes through the intestinal mucosa³¹ while results from another study indicated that 90% of an oral dose of collagen hydrolysate is absorbed within approximately 6 hours.
